

NetBenefit

The NetBenefit Platform

As an organization moves toward effective socioeconomic reporting, the right tools simplify the process. The NetBenefit Platform provides a cloud-based solution that allows users to easily manage their data and gain valuable metrics throughout various stages of their project. Using different modules, the NetBenefit Platform ensures organizations are taking the right steps to enhance their social impact reporting and continue moving projects forward in their development.

Engagement & Relations Module

A turn-key solution to increase the efficiency and effectiveness of your community engagement tracking. Consolidate data and automate reporting.

Consolidation and Data Consistency

Access all engagement records in one consolidated system. Reduce spreadsheets and link key data points such as communications, contacts, groups, and grievances.

Reminders and Task Management

Drive team accountability with full task management functionality. Use email and platform notifications to set reminders and ensure important actions don't get missed.

User-Friendly Design

The system is designed with simplicity in mind. Forms include auto-complete and auto-filtering to make data entry easy. Click paths through the system are intuitive and logical.

Reporting, Insights, and Analytics

Use industry-leading reporting to identify trends early, make decisions, and benchmark results. Interact, filter, and modify reports - or create new reports on the fly.

PowerBI Reporting Suite

Commitments & Agreements Module

An easy-to-use tool to monitor obligations made to stakeholders, rightsholders, and regulators.

Collaboration

Keep track of important commitments in a single consolidated area. Use a structured approach to understand commitment progress, action history, and compliance plans.

Task Management

Drive commitments to completion with full task management functionality. Use email and platform notifications to set reminders and ensure important actions don't get missed.

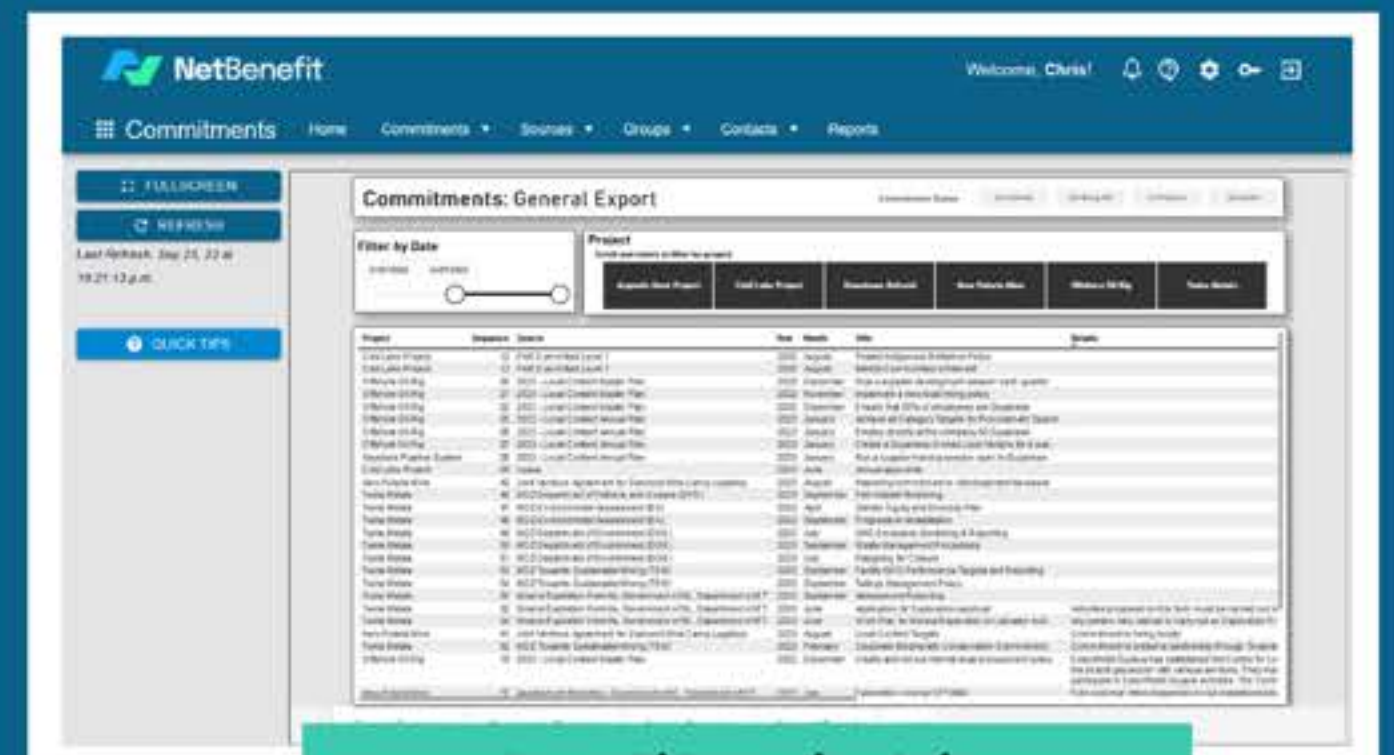

Accountability and Ownership

Keep track of important commitments in a single consolidated area. Use a structured approach to understand commitment progress, action history, and compliance plans.

Reporting, Insights, and Analytics

Use industry-leading reporting to identify trends early, make decisions, and benchmark results. Interact, filter, and modify reports - or create new reports on the fly.

PowerBI Reporting Suite

Benefits Tracking Module

Set targets, monitor supply chain activity, and understand the community benefits created by project operations.

Workforce Diversity

Understand the full picture and report on workforce diversity throughout project operations.

Community Investment

Beyond workforce and procurement detail, other community investment metrics are critical to understand and communicate impact.

Supplier Diversity

Standard procurement systems aren't designed to collect socioeconomic data from the supply chain. Instead, enable contractors, subcontractors, and suppliers to report data directly with a tool that is purpose-built.

ESG Reporting

Accurate ESG reporting is becoming more important throughout all industries. Use the high quality data from the Benefits Tracking module to satisfy multiple reporting requirements.

Local Content

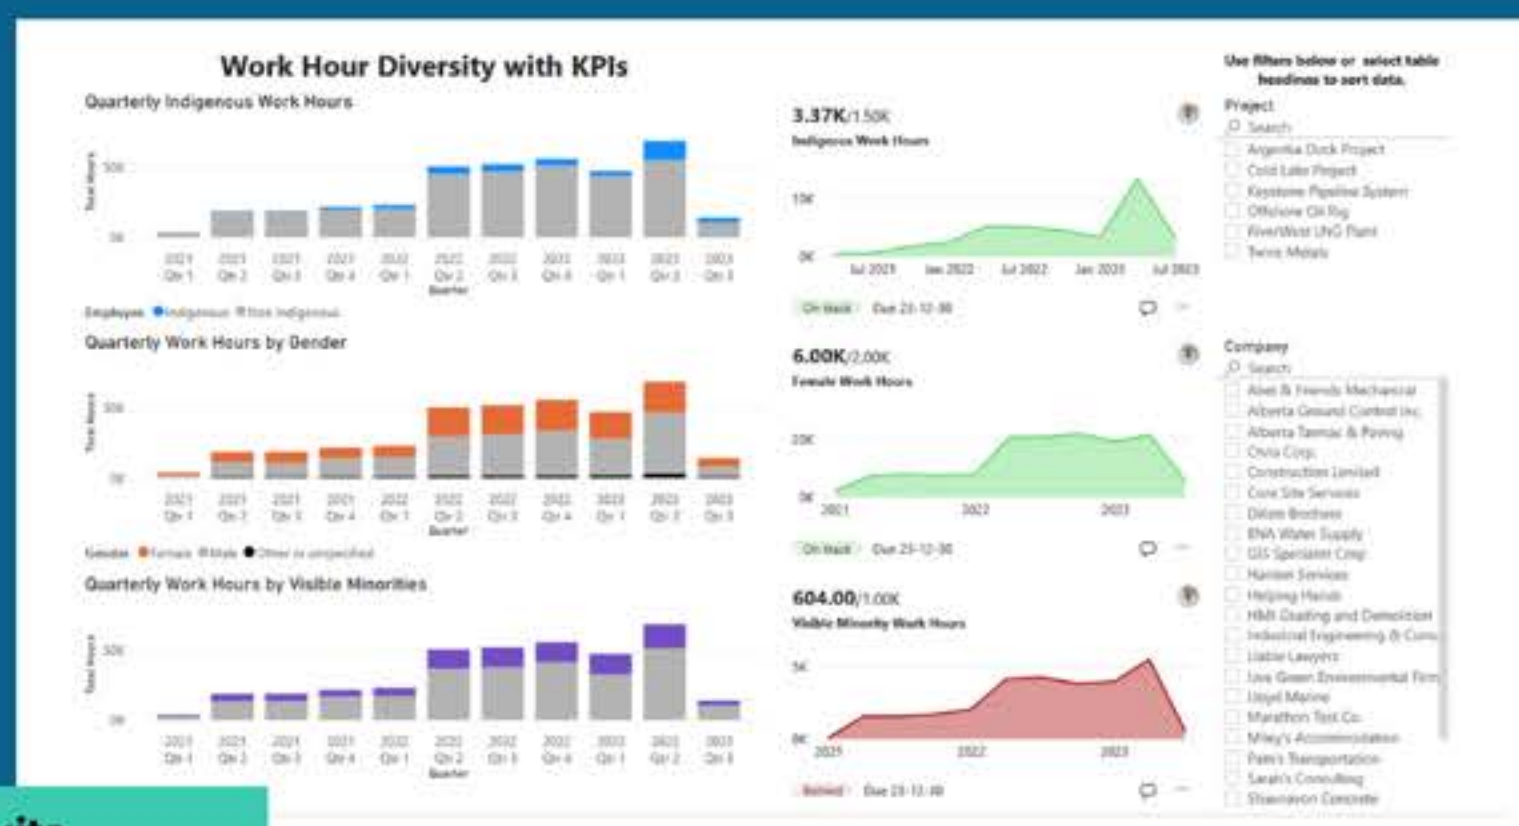

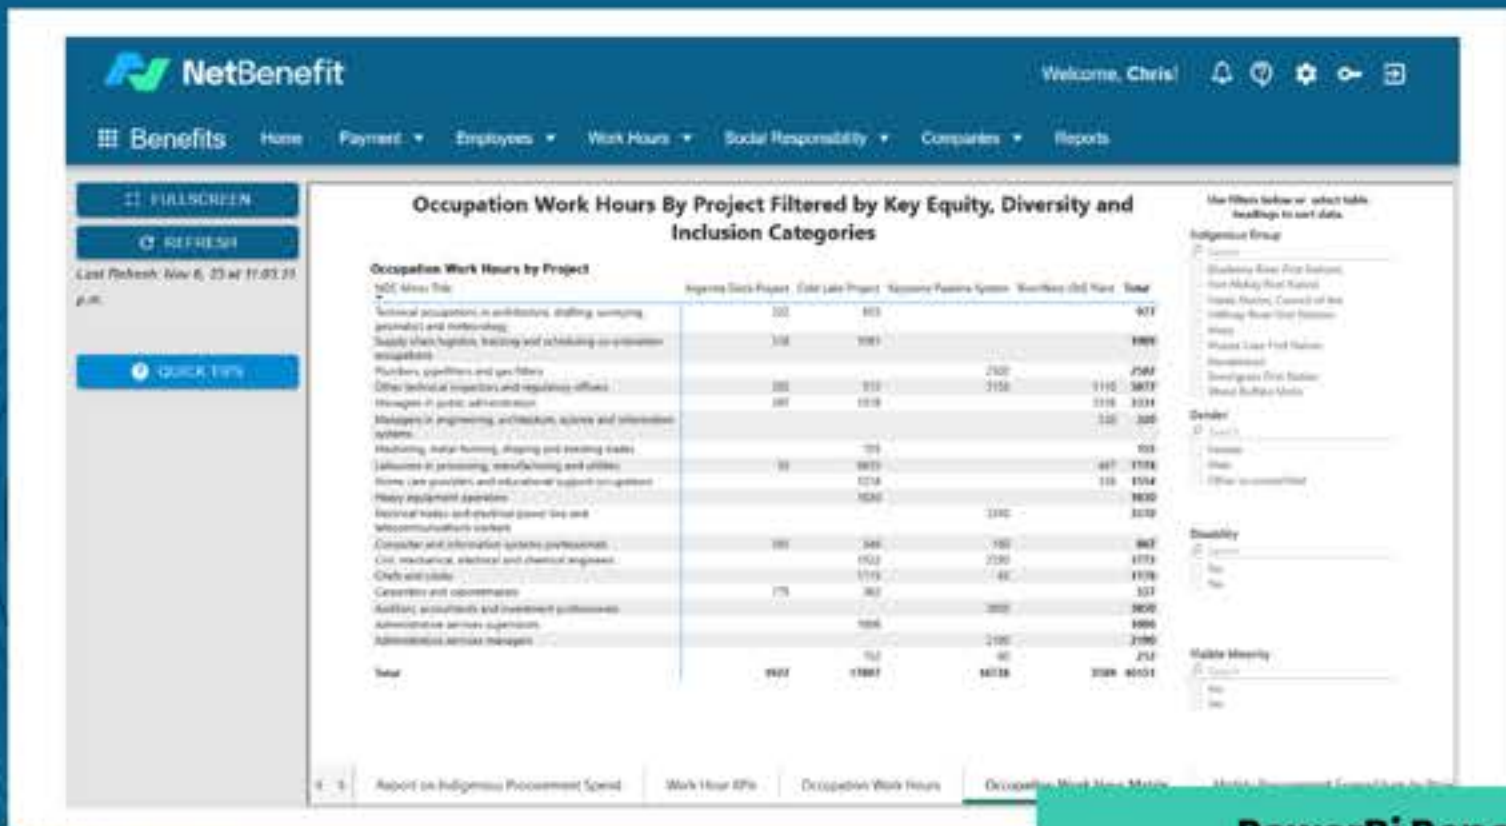

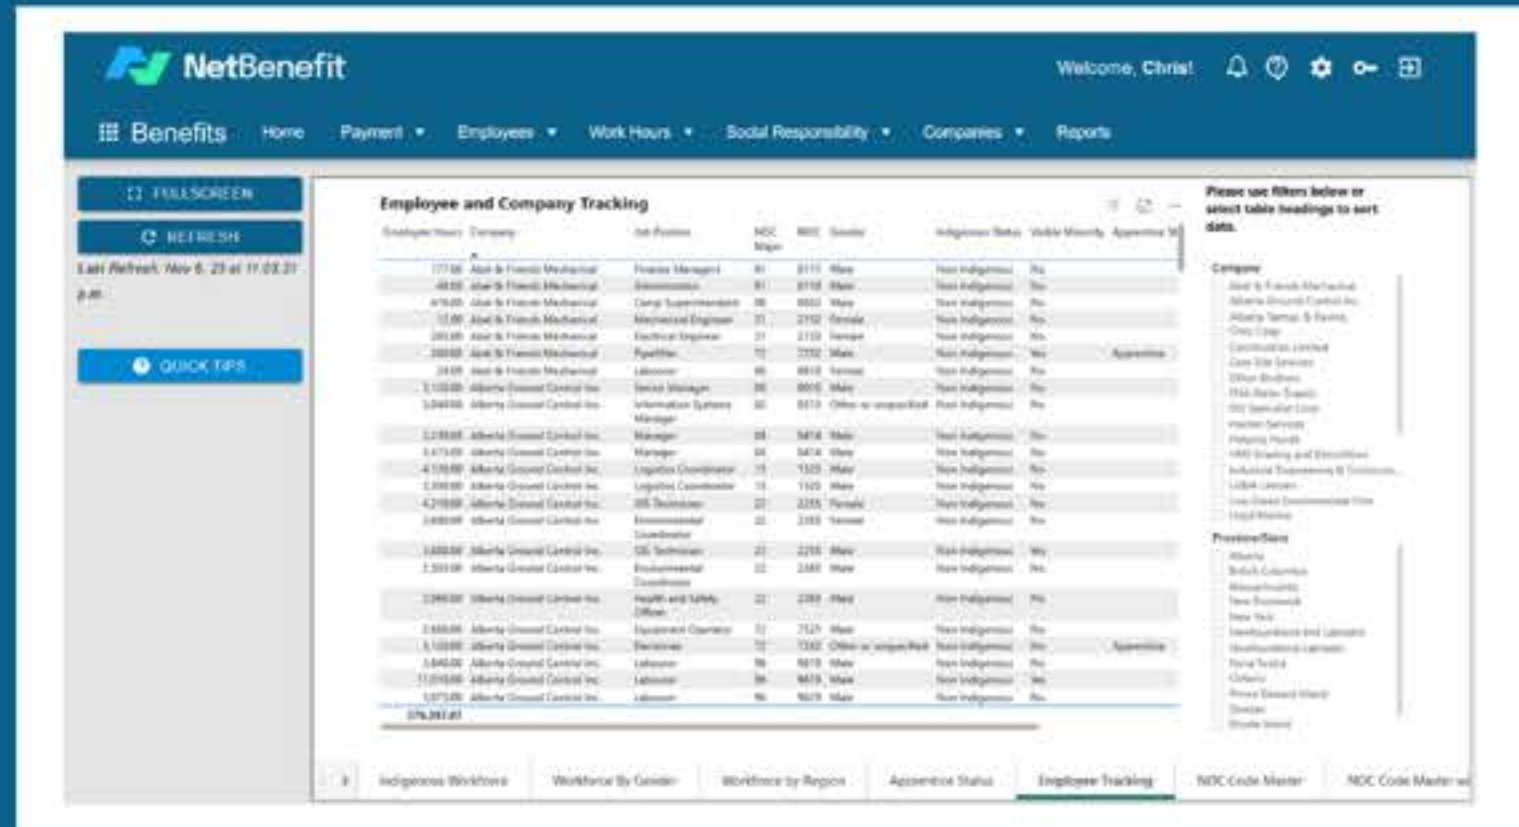

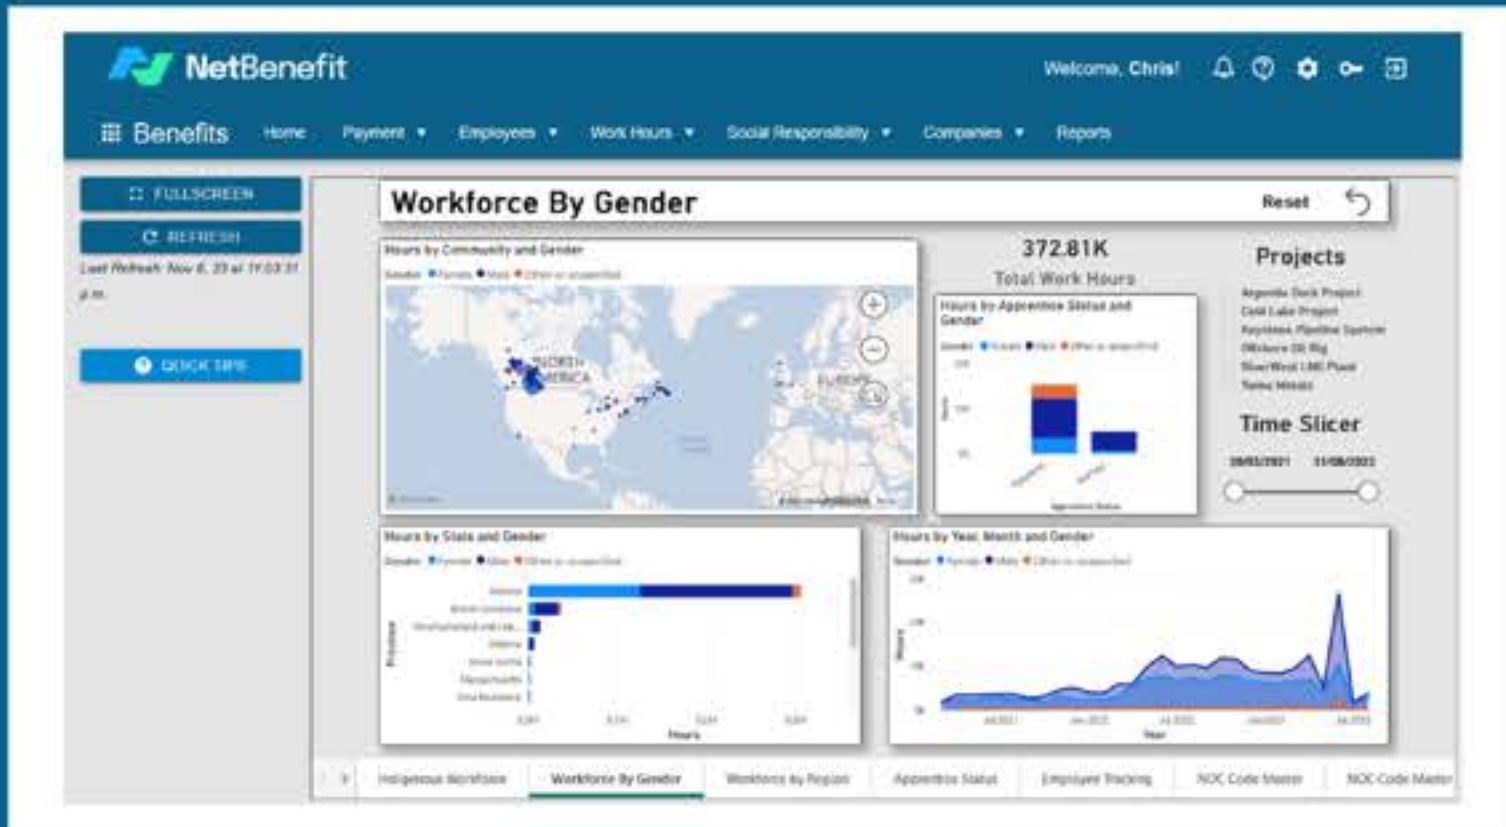

Uncover the local benefits created for communities. Monitor local spend, local employment, and local investment. Enhance government reporting and internal decision making with accurate data.

Indigenous Content

Uncover the Indigenous benefits shared with communities. Monitor spending, employment, and investment with Indigenous communities. Enhance reporting and share insights with communities.
