

The Industrial-Grade Mixed Reality Tool

Kognitiv Spark's mixed reality software, RemoteSpark™, enables you to connect, collaborate, and future-proof, regardless of your digital readiness stage.

How it Works

RemoteSpark delivers impactful use cases that drive tangible results, facilitated by seamless integration processes and sustained client support.

Remote Assistance
Hands-free connections to experts, regardless of geography

Anchoring Content
Anchor holographic content & contacts to equipment & locations

Holographic Content
Access & use holographic content to support & enhance operations

IoT Integrations
RemoteSpark integrates with external systems through APIs

Why Kognitiv Spark

Our Path to **Your Success**

As pioneers in mixed reality, we have cultivated expertise in immersive technology adoption and integration. We use this expertise to successfully guide our clients through the adoption process.
